

Volvo Bus. Driving quality of life

VOLVO BUS PARTS SUPPLY

A part of Volvo Bus Services

Maximum uptime through parts availability

Volvo Bus Parts Supply is the collective term for services that help save time in the workshop, reduce capital costs for inventory and ensure the availability of Volvo Genuine Parts. This means that downtime can be kept to a minimum and workshop efficiency is improved. Parts Supply can be tailored to your needs and is available regardless of whether you run your own complete workshop or rely on the Volvo Bus service network.

Global presence to ensure availability

Choosing Volvo Genuine Parts guarantees quality assured, safe and premium products tailored to optimise the performance of your bus or coach. If parts need to be changed Volvo can provide you with the tools to easily identify the faulty part, find the new replacement and order it. You will also benefit from Volvo's widespread logistics and warehouse network, which guarantees availability and short lead times.

Optimised inventory and cost control

Optimising your inventory with the right spare parts is a great way of controlling your costs. Volvo can offer delivery of required parts in the correct quantity, at the right time to your warehouse. This Logistic Partner Agreement also includes performance follow-up and automatic refill. Among the advantages of the agreement are high availability, healthy stock and improved turnover rate. In addition, Volvo's Parts Supply Contracts help you keep control of your costs. Based on the individual service plans applicable to your particular vehicles, the parts needed for service can be offered at a fixed price. This guarantees the latest version of Volvo Genuine Parts as well as cost control.

Workshop flow

In addition to increased availability of spare parts you will also benefit from increased workshop efficiency. By eliminating waiting time you will free workshop space and improve workflow while at the same time maximising vehicle uptime.
